

ADJUSTMENT SHEET

BLACK JACK

PROJ. 242

To make game more conservative - move posts indicated, up $\frac{3}{16}$ inch. Spotting holes are provided and can be seen on removal of posts.

Jack provides 5 adjustments. With plug in full liberal position the dealer will bust 10% or pay off 1 game in 10. If the plug is moved up to full conservative position the dealer will bust only 2% or 1 game in 50. This jack is located in back box.

- NO. MATCH ON-OFF JACK, located in back box. When plug is in 'on' position, no. match will pay 10% or 1 game in 10. In 'off' position - match lites will not lite on completion of game.
- 25¢ ADJUSTMENT JACK, located on panel, will provide -2-3-4 or -5 replays for 25¢. Insert phone tip in female jack opposite number of replays required.
- THE POWER TRANSFORMER, located on panel, is equipped with a secondary tap, which is brought out to fuse block for adjustment purposes. If your game is on location with extremely low line voltage, take fuse out of fuse clip marked normal line and place in clip marked low line. This will boost secondary voltage by approx. 5 volts.
- LEG LEVELERS, are provided for two purposes - 1st to level game on location, 2nd to increase pitch for game percentaging. If it is desired to speed up play or decrease scores, raise rear leg levelers to increase pitch.
